### INTRODUCTION

UrgoK2 (ou UrgoK2 Latex Free) est un système de compression multi-types bi-bande composé d'une bande à allongement court et d'une bande à allongement long. Sa technologie exclusive, PresSure system, basée sur des indicateurs de pression sur les deux bandes, facilite l'application de la pression thérapeutique recommandée d'environ 40mmHg dès la première application.

### INTRODUCTION

UrgoK2 (or UrgoK2 Latex Free) is a 2-layer multicomponent compression system composed of a short stretch bandage and a long stretch bandage. Its exclusive PresSure system, with pressure spot indicators on both bandages, aids the application of the recommended therapeutic pressure of around 40mmHg from the first application.
